| Store Information Includes: Company ID,Country code,Division ID,Region code,Store ID,Store name,Zone ID | 7 | 100.00 | 100.00 | 100.00 |
| Register Setup Includes: Register ID,Register's location,Register's name or description | 3 | 90.00 | 100.00 | 100.00 |
| International Includes: Foreign Currency Tender,Languages | 9 | 79.00 | 100.00 | 100.00 |

Product Technology

This group of criteria defines the technical architecture of the product as well as the technological environment in which the product can run successfully. Criteria include product and application architecture, software usability and administration, platform and database support, application standards support, communications and protocol support and integration capabilities. Relative to the other evaluation criteria, best practice selections place a lower relative importance on the product technology criterion. This apparently lower importance is deceptive because the product technology usually houses the majority of the selecting organization's mandatory criteria, which generally include server, client, protocol and database support, application scalability, and other architectural capabilities. The definition of mandatory criteria within this set often allows the client to quickly narrow the long list of potential vendors to a short list of applicable solutions that pass muster relative to the most basic mandatory selection criteria.

Product Technology Module Ratings

| Product Technology | | | | |
|--|----------------|------------------------|--------------------|-------------------------|
| Module | Total Criteria | GlobalSTORE by Fujitsu | LOGIX by TOTVS S/A | Xpert-Series by Raymark |
| | | Module Rating | Module Rating | Module Rating |
| Architecture | 201 | 80.60 | 58.05 | 85.45 |
| Includes: Application Security,Architectural Foundation,Data Integration Technologies,Device Interfaces,Integration,Messaging Protocols,Web Enablement | | | | |
| User Interface | 21 | 91.43 | 80.95 | 74.29 |
| Includes: UI Configurability | | | | |
| Application Tools | 21 | 80.00 | 55.00 | 27.50 |
| Includes: Application development tools,Application management tools,Business Model Generation,Process Modeling and Updating | | | | |
| Security | 43 | 61.27 | 39.51 | 68.86 |
| Includes: Administration,Encryption and Authentication,Log Analysis,Policy Management,Reporting,System Security | | | | |
